About FSWD Program

Ready to dive into Full Stack Web Development? This course is perfect for beginners who are looking to build their career in technology. It starts with programming basics, gradually covers the intermediate topics and moves to advanced topics like Data Structures and Algorithms. Start with HTML, CSS, and JavaScript, then master React JS and Node JS.

We offer hands-on learning with real-world projects, giving you practical skills and ensuring that you not only understand the theory but also gain the practical skills that employers are looking for. We also provide placement assistance, with unlimited mock interviews, soft skill training and resume building. Upon completion, you'll get a valuable Certificate of Completion, showcasing your skills opening doors to web development.

Don't wait. Enrol now and take the first step towards a rewarding career as a full-stack web developer. Your future is waiting.

Why choose us?

At Geekster, our mission is to provide quality education and skills that industries look for. We focus on building your programming skills through hands-on projects & Mentorship from industry experts. Our 1:1 mentorship and dedicated Student Performance Managers ensure personalized growth. Plus, our placement team connects you with top companies, empowering your success in the tech industry. At Geekster, we're not just educating; we're empowering you to thrive in the ever-evolving tech landscape.

Unlocking pathways to diverse career opportunities

Curriculum that makes you job ready

Introduction To Computer Programming

Add-On: AI-Assisted Pair Programming

⌚ 1 month

Essentials Of Data Structure & Algorithm

Add-On: AI-Powered Job Preparation and Hunting

⌚ 1.5 month

Introduction To Web Fundamentals

Add-On: Augmenting UI Development with AI

⌚ 1 month

Building Dynamic Websites Using Javascript

Add-On: Constructing AI-enhanced Search Engines

⌚ 1.5 month

Frontend Specialization With React

Add-On: Developing Your Virtual Assistant

⌚ 1.5 month

Backend Development Using Nodejs

Add-On: Launching Your Startup with AI

⌚ 1.5 month

Program Curriculum

Module 1: Introduction To Computer Programming

Fundamentals of Java

- Variables
- Input and Output
- Data Types - byte, int, char, float, double, short, long, string
- Arithmetic Operators
- Assignment Operators
- Relational Operators
- Logical Operators

Looping and Conditional Statements

- Types of Loops
- Loop Control Statements
- Conditional Statements
- Patterns

Introduction to Functions

- Built-in Functions
- User-Defined Functions
- Return Statement

Functions

- Introduction to Array
- Introduction to Time Complexity

Outcome

4 Star Hackerrank

Coding Questions

Module 2: Essentials Of Data Structure & Algorithm

Arrays

- Subarrays, Two Pointers
- Prefix Array, Kadane's Algorithm
- Array as Hashmap, 2D Arrays
- Traversals, Transformation
- Modification, Rotation
- 2D Array in Real Life

Searching and Sorting

- Searching: Linear, Binary
- Sorting: Bubble, Selection, Insertion, Inbuilt

String

- Printing and Traversal
- Searching in String, Substrings
- String Miscellaneous

Collections

- ArrayList
- Stack
- Hashmap
- Queue
- Priority Queue

Program Curriculum

Module 3: Introduction To Web Fundamentals

Git and Figma

- Basic Command Lines
- What is Git and GitHub
- Git Commands: Init, Add, Commit, Push, Pull, Diff
- Introduction to Figma
- Understanding Component Architecture in Figma
- Enhancing Design Skills

CSS Essentials

- Introduction to CSS
- Selectors, Units, Positions
- Text, Font, Box Model
- Flex, Grid, Responsiveness
- Animations, Transitions

Getting started with HTML

- Understanding the Internet
- Introduction to HTML
- Layouting, Lists, Tables
- Forms, Semantic HTML
- IFrames

Tailwind CSS

- CLI Installation
- Utility-First Design
- Typography and Color
- Flexbox, Grid, Responsiveness, Animations

Outcome

Module 4: Building Dynamic Websites Using Javascript

JavaScript Fundamentals

- Introduction to JavaScript
- JavaScript Variables and Data Types
- Conditionals and Control Statements
- Arrays and Strings in JavaScript
- Objects and Functions

Asynchronous Programming

- What is Asynchronous Programming?
- Timing Functions
- Event Loop
- Callback , Promises and Async Await
- What is API ?
- Debouncing and Throttling

Program Curriculum

Module 4: Building Dynamic Websites Using Javascript

Understanding DOM

- What is DOM?
- Defer, Async Keywords
- CRUD Operations Using DOM
- Understanding Events
- Event Propagation

Browser Storage

- Local Storage
- Session Storage
- Cookies

Outcome

- 20+ Mini Projects
- Building Chrome Extension
- Building Search Engine
- Gmail Clone

Module 5: Frontend Specialization With React

Fundamentals of React

- What is React?
- Understanding Component-Based Architecture
- DOM Updation in React
- Hot Reloading

React Hooks

- React Props
- Rendering JSX Elements
- Hooks in Functional-Based Components

Authentication Using Firebase

- Introduction to Firebase
- Authentication vs Authorization
- Firebase Setup
- CRUD with Firebase

State Management Using Redux

- Redux Toolkit for State Management
- Projects Using Redux
- State Management
- Global State Management

Outcome

- Google Drive Clone
- CodePen Clone
- Figma Clone
- Swiggy Clone

Program Curriculum

Module 6: Backend Development Using Nodejs

Getting Started with Node

- Understanding Node
- How Node.js Works
- Understanding Core Modules of Node.js
- CRUD Operations Using File System
- Parsing and Joining Path Using Path Module

MongoDB

- Introduction to Databases
- Relational vs Non-Relational Databases
- Introduction to Mongoose
- Creating Schemas

Express.js

- Express Setup
- MVC Architecture in Detail
- Creating First Server
- Understanding the Request and Response Object
- Sending HTML Files with Express
- Static Assets with Express

Getting Started with APIs

- Understanding REST APIs
- Setting Up Routes and Controllers for APIs
- Query Params
- Authentication vs Authorization
- JWT Authentication
- Exploring Passport.js Package

Outcome

- Threads Clone
- Netflix Clone
- Twitter Clone
- Broker Clone
- E-commerce Clone

Personalized Placement Assistance

100+ hours of Personalised Career Prep for Accelerated Job Success 🚀

Sprint 1

1:1 Expert Counseling

Analyze your strengths, weaknesses, and current market trends to pinpoint areas for rapid skill development.

Sprint 2

Industry Mentor

Get direct feedback and targeted guidance to improve your interview performance and overall career strategy.

Sprint 3

AI-Powered Portfolio Upgrade

Optimize your resume, LinkedIn, and GitHub profiles with AI tools to stand out from the crowd.

Your Dream Job

Sprint 4

Real-World Coding Challenges

Tackle company-level assignments under strict time limits, mastering interview-style problem-solving.

Sprint 7

Placement Drives

Access job opportunities from our network of 800+ hiring partners

Sprint 6

HR Readiness

Master self-introductions, project discussions, salary negotiations, and confidently explain any career gaps.

Sprint 5

Mock Technical Interviews

Reduce interview anxiety and build confidence through realistic simulations and expert feedback.
